## STORYTELLING

Atman is the beginning, the truth, your truth, the essence of your soul.

Atman is the unchanging, eternal and conscious.

Is for why Atman is balanced by the position of the objects, they are precisely calibrated for... Atman is "balanced" by the position of the objects if they are precisely calibrated for visual impact.

There must be harmony between the color spectrum and the lines of the pieces. Multifunctional furniture helps to generate flexibility, so we always select furniture that can precise multiple uses.

Mixing furniture, textiles, lighting and art with different textures and complementary tones is essential to create unique spaces that are both transcendent and elegant.

Everything must give the impression of having been placed with a precise reason, because the intention is to transform a home into a magical refuge.

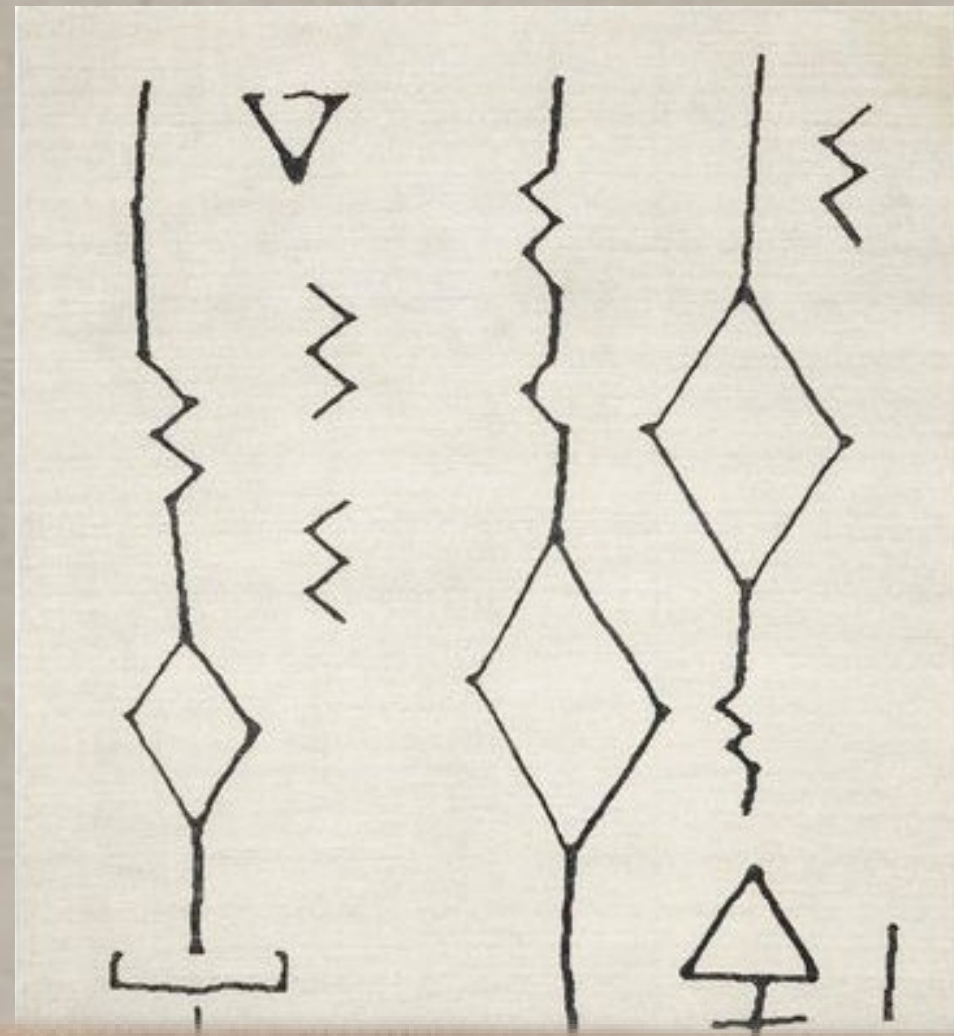

Atman is inspired by nature. We use natural color palettes observing the small differences in tonality of ivory, greenery plants, natural fibers and the intricate and detailed textures of the wood.
