Lovers Path

Dedicated to all lovers who are destined to meet on the way.

Tulum

Tulum

—

Ancient Mayan City where **mysticism** emerges between **the waves** and the green sea of **the jungle**, captivating the senses, leading us to explore paths that balance the body and the soul, with an eclectic philosophy within its constructions and focused on **honoring the past and life**. starting from nature as a legacy inherited from our millennial generations for future ones.

—

Location

Just 10 minutes from the turquoise beaches of Tulum, and within the region with the highest growth in capital gains in the city, with project designs that preserve and enhance the nature of the region.

AV. KUKULCÁN

ZONA HOTELERA/ MAR CARIBE

Development

BEH K'EECH which in the sacred Mayan language means "LOVERS PATH" was born to give place to all those who are and will be destined to meet in this life, materializing as an exclusive development of only ELEVEN units.

Full of **dedication, love and tribute** to our ancestors, it is then that we know the BEH tower with 5 apartments and K'EECH with 6 apartments, two great architectural Loves where their destiny is always to be found through its suspension bridge and they will never be lost anymore as all its Paths will lead them to meet in one of its amenities.

As its central axis, Beh K'eech takes nature for the creation and distribution of the ELEVEN exclusive apartments distributed in the BEH and K'EECH Towers, preserving just over 40% of the land as a natural and permeable area for resupply of the aquifer and in this way reduce our constructive footprint to a greater extent, resulting in an organic architecture, making the construction integrate with nature, making it a living and conscious development.

Qualities

At Beh K'eech we know how important each and every one of the materials and finishes that you will find in your future apartment in the Jungle is, therefore, each one of them was selected thinking about to create a space that envelops you in the essence and architecture of the region.

CAMINO DE LOS AMANTES

The image features a minimalist design with light gray palm fronds in the top-left and bottom-right corners. The central text is rendered in a classic serif font, centered horizontally and vertically.

The space and the different textures of the materials blending as a single element to create unrepeatably sensations in each of its corners.

Work progress

January 2022

A dark, moody photograph of a path through a forest. Sunlight filters through the trees, creating a series of bright, diagonal beams of light that cut across the scene. The path is visible in the lower right, leading into the distance. The overall atmosphere is mysterious and serene.

On this path the only one missing is you.
