

Tulum Habitat

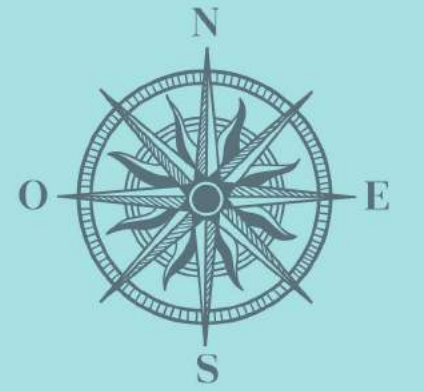

Corax Tulum Habitat is a project designed to provide maximum comfort in its spaces, with tasteful details, quality construction, and illuminated interiors. The exterior gardens make the place cozy and comfortable, with swimming pools, a solarium and terraces facing the jungle.

With a privileged location, ideal to enjoy the Mexican Caribbean coast, cenotes, holistic centers, archaeological sites, nature reserves and the most vibrant beaches of Tulum.

Connect with Mother Nature, the tranquility of the area, the jungle greenery and the aroma of trees.

Caring, respecting, enjoying, sharing and thanking the Mayan ancestral land for its abundance is the vision of the Corax Community. Minimizing environmental impact and contributing to its conservation with sustainable practices are the basis of our values.
